Our Story

Never Blind Hunting Blinds is a family owned business striving to make your hunting experience the best.

We have been in Manufacturing since 1992 and built our first blind for ourselves in the late 1990's. We continued to perfect our ideas till in 2018 we decided to put our products into production. We have continued to upgrade and broaden our line of hunting blinds making it one of the best on the market.

All our blinds are built in kit form and are stacked and shipped with all the hardware and pictured instructions. Together with our Team we are continuing to make our blinds the high-quality blind that we would want to hunt out of.

With our scent free window that still holds its whisper quiet sound you can open and close windows with deer in close proximity. Our superior, exterior coating insures that your blind will hold up in all weather.

We enjoy God's creation and it is our vision to provide you with a product that you can make many happy memories with, for years to come!

The first Blind made in 1998

These Blinds are next level! Very painless to set up and unbelievable comfort to hunt from! With the ones we have used it has been a great experience! These blinds truly spoil you! Such a great value and excellent customer service!
